Paul C. Clifford, Editor

	Issue	Page
PROBLEM 8: The editor discusses a solution sent in by George V. Herrold.		

Problem 8 was first proposed in the May 1953 issue — Nov. 1953 37

PROBLEM 9: Suggested solutions to this problem as proposed in the May 1953 issue are credited to Frederick W. Cleaver and George V. Herrold, and are discussed by the editor. — Nov. 1953 38

PROBLEM 8: This problem on truncated sampling with c=0 is discussed by Professor Mosteller of Harvard. He shows (1) how to reduce considerably the bias in the intuitive estimate of p, and (2) how to obtain, at least approximately, the variance of this intuitive estimate — Mar. 1954 50

I—FROM THE SCRAP BOX

Letters discussing "Some Remarks Concerning the Lot Plot Plan," published in the September issue, are contributed by the author, Professor C. C. Craig (University of Michigan), and by Dorian Shainin (Rath and Strong) — Nov. 1953 40

Professor Ralph O. Swalm of Syracuse University contributes a provocative and informal discussion of quality control and wage incentives. He sets forth some of the basic considerations involved and raises a number of questions bearing on the twin problems of measuring quality of work and formulating criteria for paying for superior quality of work. — Nov. 1953 41

A brief report on the origin of the Mexico City Section of ASQC by Ing. Domingo M. Lopez is contributed through Fred Halton. — Nov. 1953 42

Correspondence between P. M. McDonald and Truman Read of the Hartford Section, and a note commenting on this correspondence by L. S. Eichelberger, provide some amusing remarks about attendance records kept by the Hartford Section on its meetings from February 1950 through May 1952. — Nov. 1953 44
